

IMDS

In the following example, the preparation of an MDB report in short (screen shots) for a rotating piece with zinc-nickel coat and the sending of the report to Voith are described.

Contents:

I. How to prepare the report

- 1) Logon into the system
- 2) Preparation of MDB
- 3) Entry of component data
- 4) Search of material5) Adoption of material
- 6) Indication of weight (net weight without coating)
- 7) Addition of material (ZnNi coating)
- 8) Search of material (ZnNi coating)
- 9) Selection (coating)
- 10) Indication of weight (coating)
- 11) Selection (passivation)
- 12) Indication of weight (passivation)
- 13) Save the report

II. How to send the report

- 1) Manufacturer's details
- 2) Recipient's details
- 3) Company name
- 4) Selection of organization
- 5) Data entry
- 6) Save and send

I. How to prepare the report

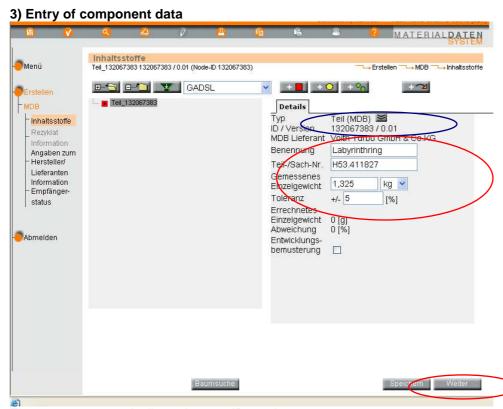

1) Logon into the system

2) Preparation of MDB

Press the "Part" button

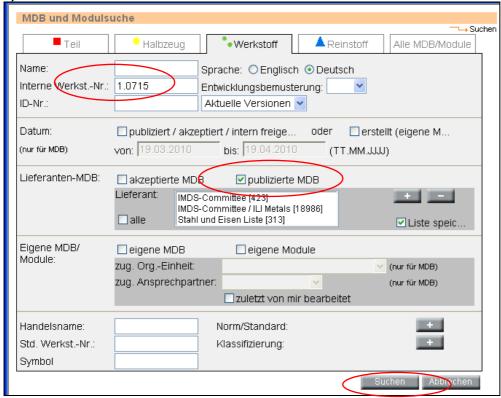

The system automatically assigns an ID version.

- ➤ Entry of designation, part/article number, weight and tolerance (normally 5%).
- Press the "Continue" button

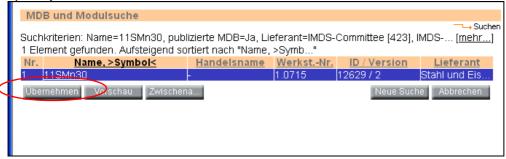

4) Search of material

- Tick the box at "published MDB" Use the published material reports (IMDS / steel and iron list); if necessary, a list of the own unfinished part supplier.
- Enter the material number (e.g. 1.0715); if not known it is also possible to enter the material designation / name (e.g. 11SMn30).
- > Press the "Search" button

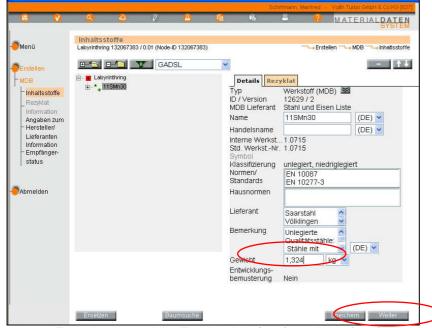

5) Adoption of material

Press the "Adopt" button

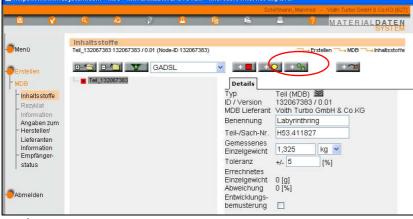

6) Indication of weight (net weight without coating)

- Enter the net weight. Total weight (part) weight of surface coat, in this example: 1 g coat, thus enter 1,324 kg. (Surface x film thickness x specif. weight of ZnNi).
- > Press the "Continue" button

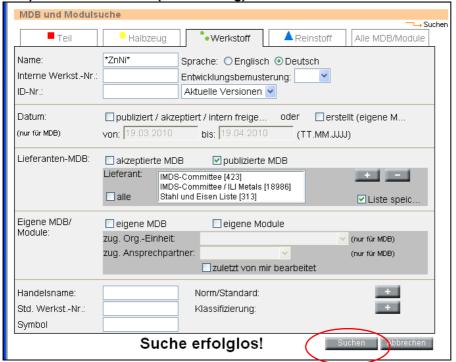

7) Addition of material (ZnNi coating)

Press the "+" button

8) Search of material (ZnNi coating)

- Tick the box at "published MDB" Use the published material reports (IMDS / steel and iron list); if necessary, a list of the own unfinished part supplier.
- ➤ Enter the designation of the coat (e.g. ZnNi, enter again with *----* if the "Search unsuccessful" message appeared
- Press the "Search" button

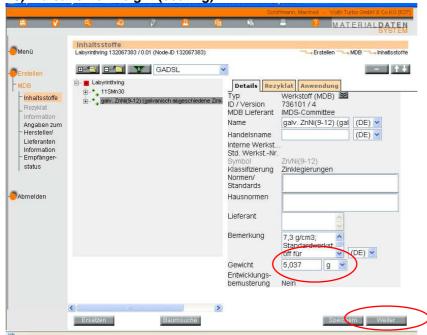

9) Selection (coating)

Press the "Adopt" button

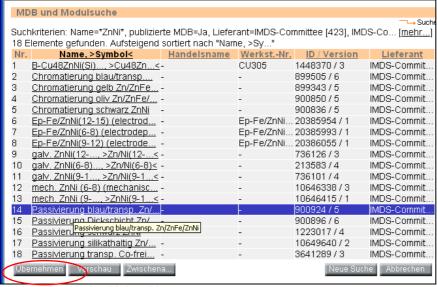

10) Indication of weight (coating)

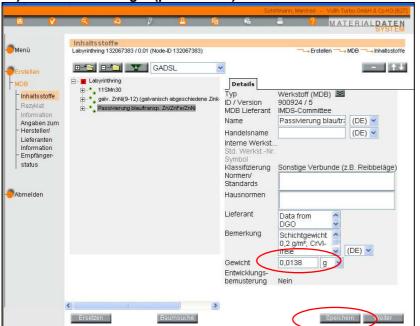

- Enter the weight of coat, e.g. 5.037 g. (Surface x filmthickness x specif. weight of ZnNi)
- Press the "Continue" button

11) Selection (passivation)

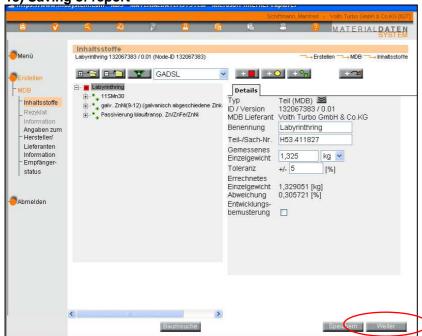

Press the "Adopt" button

12) Indication of weight (passivation)

- Entry of weight of coat, e.g. 0.0138g. (Surface x specif. weight of passivation)
- Press the "Save" button

13) Saving of report

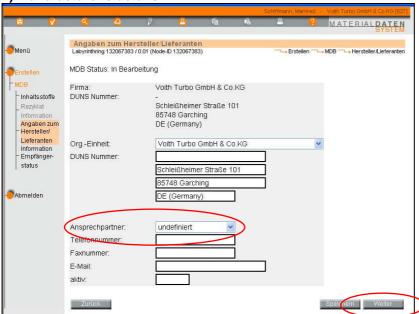

Press the "Continue" button

VTA arak- Lwg Page 7/ 9

1) Manufacturer's details

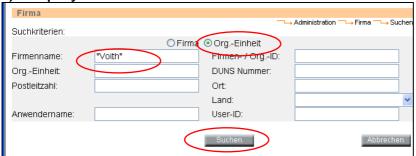

- Open the checkbox and select the contact partner. Company's address / organization has already been saved in the basic setting.
- Press the "Continue" button.

2) Recipient's details

Press the "Add" button.

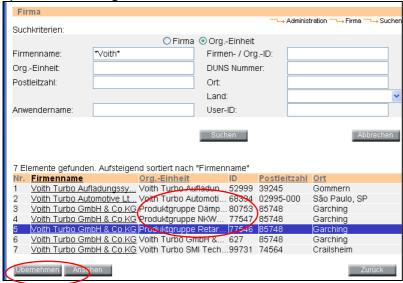

3) Company name

- Enter the *Voith* company name.
- Select organization
- > Press the "Search" button.

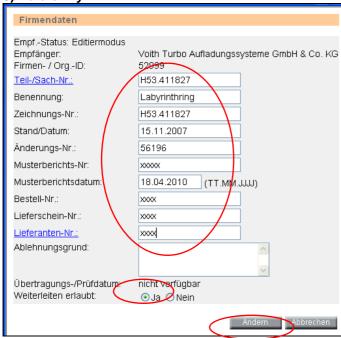

4) Selection of organization

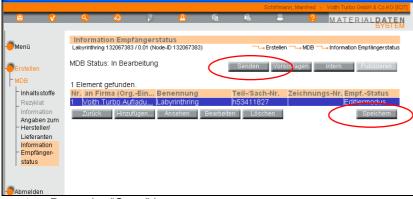

- Select the organization
- Press the "Adopt" button.

5) Data entry

- Fill in the columns: Part/Article No. to Supplier No.
- Forwarding to transmission/test date is permitted: "Yes"
- Press the "Change" button

6) Save and send

- Press the "Save" button
- Then press the "Send" button.
