Voith is modernizing the PM 1 of Matías Gomá Tomás in Spain

2025-04-28

- The scope of supply includes an upgrade of the approach flow system, the latest Voith MasterJet 4Tec headbox and a DuoShake DG250.
- The rebuild improves paper quality and increases production capacity by 10 percent per year.
- Start-up of the production line after rebuild is planned for the end of 2025.

LA RIBA, SPAIN/HEIDENHEIM. Voith Paper, a leading full-line supplier of technologies and services for the paper industry, has received an order to modernize PM 1 at Matías Gomá Tomás in La Riba, Spain. On PM 1, Matías Gomá Tomás produces 100 percent recycled containerboard on a wire width of 5,150 mm. The aim of the rebuild is to improve paper quality and increase production capacity from the current 100,000 tons to 110,000 tons per year. Start-up after the rebuild is scheduled for the fourth quarter of 2025. With the rebuild, the company is ideally equipped for the future to meet the increasing demands of the market.

“We are convinced we have found a very reliable partner in Voith, who is supporting us in the rebuild of PM 1 with customized solutions to achieve our production targets,” says Enric Fuster Ventosa, General Director at Matías Gomá Tomás. “By modernizing our plant, we will not only be able to improve the quality of our products but also increase our production capacity to 100,000 tons per year, which is equivalent to an increase of 10 percent.”

“Our goal is to provide our customers with sustainable, efficient and reliable solutions that help them optimize their production processes and achieve their goals,” explains Martin Jauch, Senior Vice President Rebuilds at Voith Paper. “We are pleased to further strengthen our good partnership with Matías Gomá Tomás on this project and to build trust.”

The scope of supply includes an approach flow upgrade, MasterJet4Tec headbox with EdgeMaster, DuoShake DG250 and the upgrade of the existing cleaning and screening with new InduraClean cleaner stage, an IntegraGuard screen and a ComMix static mixer. The MasterJet 4Tec marks the latest, fourth generation of Voith's MasterJet headbox and offers significant advantages in four key areas: formation, pulsation damping, operating convenience and energy efficiency. The new industrial design of the MasterJet 4Tec also improves the cleanliness of the system and thus its runability. The DuoShake DG features real-time data monitoring, trend analysis and cloud connectivity.

"We have put together a customized rebuild package for Matías Gomá Tomás' PM 1 that improves the efficiency of the process and the quality of the end product at various points in the process, while also reducing maintenance requirements," explains Philip Schnellinger, Process Technologist at Voith Paper. "Our service teams will also provide support after the rebuild to further improve the performance and quality of the PM 1."

About the Voith Group

The Voith Group is a global technology company. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, paper, raw materials and transport & automotive. Founded in 1867, the company today has around 22,000 employees, sales of € 5.2 billion and locations in over 60 countries worldwide and is thus one of the larger family-owned companies in Europe.

The Group Division Voith Paper is part of the Voith Group. As the full-line supplier to the paper industry, it provides the largest range of technologies, services and products on the market and offers paper manufacturers holistic solutions from a single source. The company's continuous stream of innovations facilitates resource-conserving production and helps customers minimize their carbon footprint. With its leading automation products and digitalization solutions from the Papermaking 4.0 portfolio, Voith offers its customers state-of-the-art digital technologies to improve plant availability and efficiency for all sections of the production process.
