### **First customers impressed by QCS software platform from Voith**

2013-08-14

ComCore is a software platform from Voith Paper that will integrate its entire QCS product portfolio in the future. With this common platform, it is now even easier to deliver solutions that are exactly coordinated with the needs of paper producers. ComCore is already in use with more than 15 paper machines worldwide, in various paper grades. The customers are very satisfied and are impressed by the advantages that ComCore offers.

The various Voith QCS products such as OnQ ModuleJet, OnQ FormingSens and the Voith LSC Scanner are consolidated in ComCore. ComCore thus offers, with just one click, a way to perform all necessary interventions and call up all necessary information about the various components and applications of the quality control system. Other products can be integrated at any time by expansion of the software modules. The start-up times are thus shortened. The uniform platform architecture also reduces the training needed for service personnel.

In developing ComCore, Voith relied on established standards in the industry such as OPC for communication and combined them with innovative technology such as HTML5. As it is operated with a web user interface ComCore is as easy and intuitive to use as possible. ComCore can also be operated with commercially available tablet PCs, which increases the mobility and flexibility of employees. Time-consuming installation is not an issue with these operating stations, as the ComCore user interface is simply called up via Internet Explorer.

If work is undertaken directly on a part of the paper machine, the corresponding personnel thus keep all other machine settings in view on their mobile tablet PCs and can better react to changes. Thus ComCore additionally provides a clear safety advantage for the individual employee.

For any further questions on automation, Voith's worldwide service network is always available for customers.

Further information is available on the Voith website at [www.voith.com/paper](http://www.voith.com/paper). Voith Paper is also on [Twitter](#) and [YouTube](#).

Voith Paper is a division of the Voith Group and the leading partner to and pioneer in the paper industry. Through constant innovations, Voith Paper is optimizing the paper manufacturing process, focusing on developing resource-saving products to reduce the use of energy, water, and fibers. Furthermore, Voith Paper offers a broad service portfolio for all sections of the paper manufacturing process.

Voith sets standards in the markets energy, oil & gas, paper, raw materials and transportation & automotive. Founded in 1867, Voith employs almost 42,000 people, generates €5.7 billion in sales, operates in about 50 countries around the world and is today one of the biggest family-owned companies in Europe.
