

For Immediate Release

Voith Turbo, Inc. and Danieli Centro Recycling Sign Distribution Agreement

York, Pa. (March 28, 2018) – Voith Turbo, Inc., a specialist for drive solutions, systems and comprehensive services, and Danieli Centro Recycling, a worldwide leading manufacturer of recycling machinery, announce an agreement for Danieli to distribute Voith products and services to shredder operators. Customers can now single source Voith quick-time delivery universal joint drive shafts (u-joint shafts), hydrodynamic couplings, SafeSet couplings and highly flexible couplings via Danieli.

“Through our partnership with Danieli, we’re improving the operator’s experience by providing easy access to superior drive components from Voith,” said Kyle Kluttz, vice president, NBS Mining and Metals Americas, Voith Turbo, Inc. “Single sourcing offers many benefits including enhanced administrative efficiency and lower inventory costs.”

Using Voith quick-time delivery, North American delivery times have been decreased from months to weeks. The Voith warehouse, located in York, Pennsylvania, stocks all of the components for drive shafts in the 198-to-550-millimeter diameter size range, allowing for expedited distribution.

The Voith u-joint shafts feature a robust modular design, a universal fit and maximized torque capacities which are as much as 20 percent higher than equal-sized competitor products. These drive and hydraulic solutions significantly increase the productivity and profitability of capital equipment including shredders, balers and conveyor systems.

In addition, Voith provides a wide range of parts and driveline solutions including connection and torsionally flexible couplings, SafeSet torque limiters, permanent and temporary driveline torque monitoring systems, as well as transmissions, axle drives, torque converters, and hydrostatic pumps. These components are vital for a wide variety of industries and applications, including metal processing, recycling, mining, transportation, rail, and test-rig equipment.

“For more than 20 years, Danieli has been using and recommending Voith SafeSet couplings to protect shredder drivelines and motors from unshreddables. Thanks to Voith products, Danieli shredders have never experienced catastrophic failures with consequent expensive repairs and downtime,” said Everson Cremonese, sales director, Americas, Danieli Centro Recycling.

For more information about Voith Turbo’s products for the recycling industry, please visit <http://ow.ly/HOIx30i4dzH> or stop by booth 2224 at the [ISRI Convention and Exposition](#) from April 14-19 in Las Vegas, Nevada to discuss the partnership with a Voith representative.

About Voith Turbo

Voith Turbo, a Group Division of Voith, is a specialist for intelligent drive solutions, systems and comprehensive services. Customers from highly diverse industries such as oil and gas, energy, rail and commercial vehicles, ship technology, mining and mechanical engineering rely on the advanced technologies and solutions-driven expertise of Voith Turbo.

About Voith

Voith is a global technology group. With its broad portfolio of systems, products, services and digital applications, Voith sets standards in the markets of energy, oil & gas, paper, raw materials and transport & automotive. Founded in 1867, today Voith has more than 19,000 employees, sales of \$4.7 billion and locations in over 60 countries worldwide, and is one of the largest family-owned companies in Europe. For more information, visit www.voith.com.

About Danieli Centro Recycling

Danieli Centro Recycling division operates in the field of ferrous and non-ferrous scrap recycling and comprises of the specialized companies Danieli Lynxs, Danieli Henschel and Danieli Riverside Products. With years of experience in the processing of metal scrap, and hundreds of installations worldwide, Danieli Centro Recycling best meet the needs of metal scrap processing companies, both recycling and steelmaking, worldwide. Part of the Danieli Group, leading global supplier of plant equipment to the metals industry, Danieli Centro Recycling follows its mission with a highly qualified competence team. Danieli is present worldwide with 9,000 employees and 8 directly managed engineering and production

centers in Italy, Germany, Thailand, China, Austria, India and Russia. For more information, visit <http://www.danieli.com> and www.danieli-centro-recycling.com.
