### **Pulper detrashing from Voith proves a success in many stock preparation lines**

2013-10-11

Disposal of the various contaminants contained in recovered paper poses the greatest challenge to pulper detrashing machines, but the IntensaMaXX from Voith masters it easily. IntensaMaXX facilitates malfunction-free operation with the highest concentrations of contaminants. IntensaMaXX was able to demonstrate this extraordinary capacity in many stock preparation lines. Paper manufacturers worldwide are convinced – already more than 30 units have been sold.

“In May 2013 we put the first IntensaMaXX detrashing machine into operation,” says Dr. Marietta Jass-Teichmann, CEO of Papierfabrik Adolf Jass GmbH & Co. KG in Fulda, Germany. “Since then it has been running to our complete satisfaction. The capacity is extraordinarily good. For that reason we have also been using a second IntensaMaXX for disposal since the beginning of August.”

An excentric and asymmetrical enclosure prevents spinning and every type of tail formation in the IntensaMaXX so that even a very high contaminant content does not cause problems during operation. As the contaminant discharge is oriented downward it facilitates reliable removal of heavy contaminants such as screws and stones. The rotor and screen plate are attached to the top of the machine, to minimize wear.

IntensaMaXX works in an extremely reliable fashion with high throughput and a low maintenance outlay. Along with the high level of operational reliability, other costs can be reduced since substantially less energy is consumed than with the use of other detrashing machines. The investment in the machine is amortized in noticeably less than a year.

IntensaMaxx is part of the BlueLine from Voith. BlueLine is an innovative product line for stock preparation which, thanks to the most modern technology, keeps energy, water and fiber consumption as low as possible.

Further information is available on the Voith website at [www.voith.com/paper](http://www.voith.com/paper). Voith Paper is also on [Twitter](#) and [YouTube](#).

Voith Paper is a division of the Voith Group and the leading partner to and pioneer in the paper industry. Through constant innovations, Voith Paper is optimizing the paper manufacturing process, focusing on developing resource-saving products to reduce the use of energy, water, and fibers. Furthermore, Voith Paper offers a broad service portfolio for all sections of the paper manufacturing process.

Voith sets standards in the markets energy, oil & gas, paper, raw materials and transportation & automotive. Founded in 1867, Voith employs almost 42,000 people, generates € 5.7 billion in sales, operates in about 50 countries around the world and is today one of the biggest family-owned companies in Europe.
